| Here is an example... | | |
| Aeroplane Flight | 1.77 | Flew from LONDON to ORD |
| Car Journey | 3.5 | 10,000 miles |

Offset cost: £39.59

TOTAL COST: £39.59

CURRENT PROJECTS FROM ENVIRO ASSOCIATES:

Reduce what you use. Reuse what you have. Recycle what you have got.

Some tips for you, or your company we felt here at Enviro Associates Limited would help you protect the Environment, save energy and become more “green”.

Residential

- Some houses lose a lot of heat through gaps. Use a brush or seal on places such as letterboxes, keyholes, floorboards and skirting.
- Your loft can be a big factor of your house losing heat and in turn wasting energy. Use insulation.
- Turn your thermostat down.
- Switch to a renewable electricity supplier
- Light saving light bulbs
- Don't leave equipment on standby
- Your hot water tank is insulated
- When cooking use the correct pan size
- When making a tea or coffee use only the right amount of water
- Turn the tap off for example when brushing your teeth, don't leave it running.
- Have a shower instead of a bath

Travelling

- Avoid sharp acceleration and heavy braking
- Don't leave engines idling
- Drive on the motorway between 55 – 65mph
- Check your tyre pressures
- Avoid using the car if you can
- Avoid short journeys, walk if you can
- Remove anything that reduced your cars aerodynamics when you are not using it. A roof box for example

Air Travel

- Don't fly at all if you can avoid it
- Combine trips
- Use public transport if it is short haul
- Best to fly direct instead of doing a stop over

In your place of work

- Only turn lights on when needed
- Digitally hold things, do you really need to print something?
- Print double sided if need be
- Use windows that open in a smart way

We work along with an FSA regulated company to source Carbon Credits from Voluntary projects around the world. All of our carbon credits are of the Verified Carbon Standard (VCS) and have already been purchased by AGT Investments Limited.

When we receive settlement. This receipt and offset certificate is sent out to him with also proof of retirement from the Registry your carbon credits are held on.

Because the carbon credits are already held by AGT Investments, this can make for quick retirement of the credits from the register and in turn make you, or your company, or your family Carbon neutral in a short matter of time.
