Subject: PT SGS Indonesia RSPO accreditation

To whom it may concern,

This is to confirm that PT SGS Indonesia has applied for RSPO accreditation, including PC and SCC certification with Worldwide coverage.

The accreditation process requires ASI to perform witness audits performed by PT SGS Indonesia. For this purpose, PT SGS Indonesia is permitted to conduct the accreditation assessments. The assessments to be conducted by PT SGS Indonesia during the accreditation process are limited to the assessments that will be witnessed by ASI.

PT SGS Indonesia will only be able to issue certificates after the successful completion of the accreditation process.

Sincerely,

László Máthé
RSPO Accreditation Program Manager
